L15A(GE8) Fit RS / Light Weight Crank Pulley KIT

■ Back side of front pulley

■ Hard anodized is given to all pulleys

HONDA Jazz(Fit) RS L15A Light Weight Front Pulley KIT  
13810-L15-HAC List Price 59,000 Yen

Developed to give lighter and sportier engine characteristic. By reducing the overall weight (and inertia) of the pulleys, and by modifying the alternator pulley ratio to take advantage of the more sporty use, the burden on the engine is reduced helping to improve acceleration performance.

Installing with a new belt is important to help improve the running in process of the new pulleys.

A good affinity material is used on the oil seal face of the crank pulley to reduce friction improving sealing and to reduce wear.

- Ⓐ 2 pieces structure  
A good affinity material is used on the oil seal face of the crank pulley to reduce friction improving sealing and to reduce wear.
- Ⓑ Duralumin A-7075  
A hard base material is used the reduce wear increasing longevity of the pulleys and helping to prevent damage such as stone chips.
- Ⓒ Red anodizing (Alumite)  
These red anodized pulleys help to enhance the appearance of the engine bay.
