

What's new !!

S2000 Φ 70mm 2.35/2.4L High Power Muffler set Ver.2 / Equipped Resonator**WITHOUT COMPROMISE**

18160-AP1-700

S2000 Catalyst Adapter pipe 60mm to 70mm

Muffler Front pipe equipped Resonator 18000-AP1-702-F

In order to get the best performance, engine power, and efficiency, from the special characteristics found in the S2000 Toda 2350cc or 2400cc stroker kits, Toda has developed this exclusive 70mm muffler system through extensive Dyno and circuit testing. TODA S2000 70mm Muffler has received a good reputation, TODA Racing now add a Ver.2 Resonator Muffler set to this line up. The resonator is fitted to the front pipe, and this allows low end RPM noise to be reduced without increasing exhaust resistance.

(Muffler and Resonator front pipe can be purchased separately and retro fitted for thoughts already running the original 70mm system.)

- Straight blue titanium end pipe.

Straight tail style titanium end pipe has been designed to reduce over hanging weight and to give improved looks. Blue heat treatment giving a hard worked racing image. With the end receiving special treatment to prevent cracking.

- Stainless steel & straight diameter system.

The internal design is based around a constant ϕ 70mm pipe, with no bends or restrictions the engine is able to breath more freely so releasing more power.
(Stainless) Center pipe ϕ 70 mm + Rear pipe ϕ 60 mm \times 2 + (Titanium)Tail pipe ϕ 90 mm

S2000 Φ 70mm High Power Muffler System Ver.2 equipped Resonator 18000-AP1-702 List Price 170,000yen
(For AP1/AP2)

Sales separately for the user of the TODA regular ϕ 70mm muffler .

Front pipe of equipped Resonator 18000-AP1-702-F List price 78,000yen

S2000 Φ 60-70mm Catalyst Adapter 18160-AP1-700 List Price 25,000yen

Note : Designed to give a smooth connection between Φ 60mm of Exhaust manifold end and 70mm of Muffler Top.
