TODA High Power Muffler (Resonator) Twin Silencer for Toyota86/Subaru BRZ

Toyota 86 installation

TODA Racing introduces Twin Silencer ϕ 60 High Power Muffler (With Resonator) for the Toyota86/Subaru BRZ. Studies in balance the effects of noise and performance have enabled us to reach a good specification. Improving the sound by reducing the unpleasant droning sound when “accelerator-off “ by the use of a resonance pipe (resonator). As well an introducing a cool metallic sound particularly when “acceleration-on” which resembles that of a jet engine at takeoff.

Twin silencers used to make a more intoxicating sound.

Titanium end pipes designed with ‘melted edge’ to improve robustness, along with the blue tint to enhance a sporty look.

(Stainless steel material) Center part ϕ 60mm , (Stainless steel material) Rear branch part ϕ 50mm \times 2 , 150mm diameter twin silencers, (Titanium material) Tail part ϕ 100mm \times 2.

Toyota86 / Subaru BRZ ϕ 60mm High Power Twin Silencer 18000-FA2-T00 152,000yen

※ At the same time, TODA single silencer model is started sales as well. Designed to give low & gentler sound than the twin silencer.
