

What's new !!

TOYOTA 86 (FA20) Flywheel + Strengthened Clutch kit (Metallic Disc & Sports Disc)

**WELL BALANCED**

- TODA Original design Chrome Molly Flywheel with light weight & improved strength.

※The most important element of a flywheel is its inertia ($0.058\text{kg}\cdot\text{m}^2$) this is more important than the weight of the unit. Toda Racing flywheels are designed to improve weight, inertia and strength characteristics helping to improve the accelerating or braking response of the vehicle.

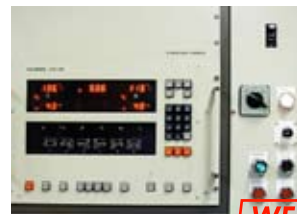

The flywheel can also be installed separately.

Super response!! Improved circuit lap times by shortening braking distance.
